Allowable Subject Matter

1. **Claims 2-3, 6-8, 10-11, and 14-16** (renumbered claims 1-10, respectively) are allowed.
2. The following is an examiner's statement of reasons for allowance.

For **claim 2**, the prior art does not teach or fairly suggest a digital camera, wherein the controller increases the gain amount of the high-sensitive image signal and decreases the gain amount of the low-sensitive image signal when the diaphragm is set to an open side, whereas the controller decreases the gain amount of the high-sensitive image signal and increases the gain amount of the low-sensitive image signal when the diaphragm is set to a small-stop side, *in combination with the other claimed elements*.

For **claim 3**, the prior art does not teach or fairly suggest a digital camera, wherein when the controller increases the gain amount of the low-sensitive image signal, the controller decreases a synthesizing ratio of the low-sensitive image signal synthesized with the high-sensitive image signal, *in combination with the other claimed elements*.

Regarding **claims 10-11**, these claims are method claims corresponding to the apparatus claims 2-3, respectively. Therefore, method claims 10-11 are analyzed as previously discussed with respect to claims 2-3, respectively.

For **claim 6**, the prior art does not teach or fairly suggest a digital camera comprising: a controller, which operates in such a manner the smaller a stop amount of the diaphragm becomes, the smaller a synthesizing ratio of the low-sensitive image signal with respect to the high-sensitive image signal is decreased, *in combination with the other claimed elements*. Note: Please read section 3.

Claims 7 and 8 are allowed because they each depend on claim 6.

Regarding **claims 14-16**, these claims are method claims corresponding to the apparatus claims 6-8, respectively. Therefore, method claims 14-16 are analyzed and allowed as previously discussed with respect to claims 6-8, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Horiuchi (US Pat. 6801248)	Horiuchi teaches an image pickup device with two exposure amounts that are synthesized and reduced in a low pass filter. However, Horiuchi does not teach all of the limitations of claim 6 especially the low-sensitive image signal and the high-sensitive image signal from the solid state imaging element. Please refer to claim 6.
Sakamoto (US Pat. 7382403)	Sakamoto teaches an imaging apparatus provide with a synthesizing processing circuit for a high-sensitivity image signal and a low-sensitivity image signal. However, the date and the assignee information for the Sakamoto patent do not comply with the MPEP.
